Standard Gracey Curette

Originally designed to be finishing curettes for fine scaling and root planing, Gracey curettes were developed in the 1940's by Dr. Clayton Gracey in coordination with Hugo Friedman, the founder of Hu-Friedy.

Each Gracey blade is offset at 70° and has one cutting edge—the lower edge. The combination of this unique blade and 9 different shank designs for specific tooth surfaces provide improved adaptation and deposit removal in scaling procedures.

Rigid & Extra Rigid Gracey

- Shank diameter is wider than standard Gracey curette
- Blade width is the same as standard Gracey curette
- Rigid: Used for moderate to heavy calculus removal
- Extra Rigid: Used for tenacious calculus removal

Standard
vs. Rigid,
SG1/2R9

After Five® Gracey

- Terminal shank is 3mm longer than Standard Gracey
- Longer terminal shank allows better access to deep pockets and areas with recession
- Blade is 10% thinner than standard Gracey curette to allow for less tissue distention when accessing deeper pockets

Standard
vs. After Five,
SRPG1/291

Mini Five Gracey

- Terminal shank is 3mm longer than Standard Gracey
- Compared to the standard Gracey curette, blade is 50% shorter and 10% thinner
- Good for scaling in deep, narrow pockets

Standard
vs. Mini Five,
SAS1/291

Micro Mini Five Gracey

- Longer terminal shank designed to access deep periodontal pockets
- Blade is 20% thinner than a Mini Five Gracey to help reduce tissue distension and ease gingival insertion

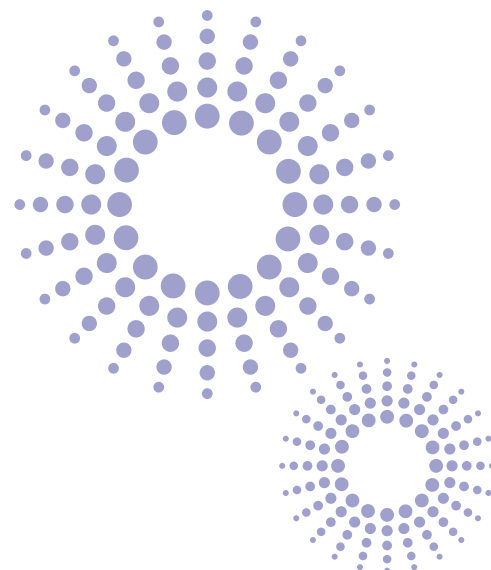

Standard
vs. Micro
Mini Five,
SMS1/291

Biogent Curettes

- Latest advances in bio-type based periodontal therapy
- Provide more tissue friendly approach and enhanced pocket access
- Shorter and thinner blade and different angulation between the shank and the working end

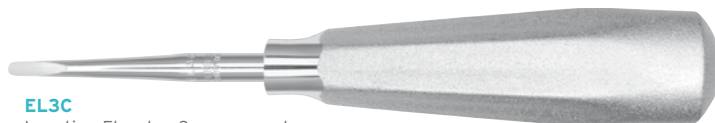

Standard
vs. Biogent
Curettes,
SG1/29LC

LUXATING ELEVATORS

EL3C

Luxating Elevator, 3 mm curved

Retail Price € 76,32

Promo Price € 59,90

Promotion valid also for:

The matt-black, scratch-resistant coating of all aluminium-titanium-nitride instruments (AlTiN) reduces adhesion of composite and reduces reflections, which is particularly advantageous when working with a magnifying glass or microscope. The slender handles are antislip but do not have deep grooves. This makes cleaning and sterilisation particularly easy and effective.

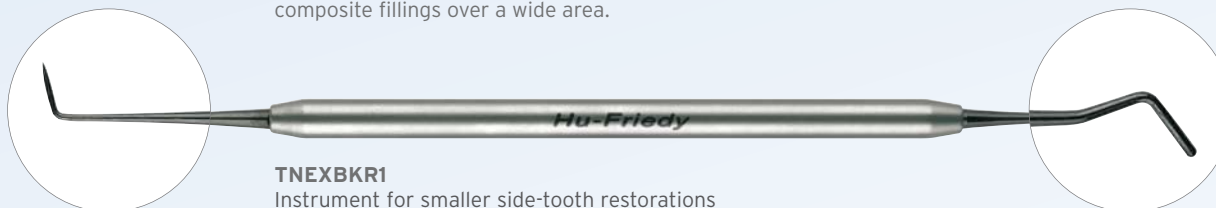

**TNCVKR1**

Front tooth instrument

Small, sharp-edged universal spatula curved at the edge. Anatomically angled, sharp-edged beaver-tail spatula for contouring large front-tooth composite fillings over a wide area.

Retail Price:
€ 41,56

Promo Price:
€ 28,90

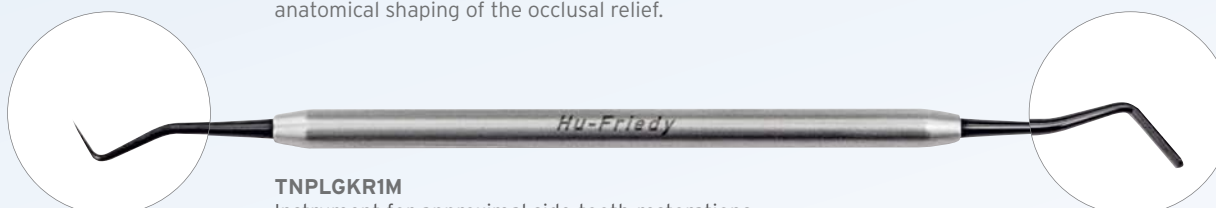

**TNEXBKR1**

Instrument for smaller side-tooth restorations

Rounded stopper for composite adaptation in the cavity, sharp tip for anatomical shaping of the occlusal relief.

Retail Price:
€ 41,56

Promo Price:
€ 28,90

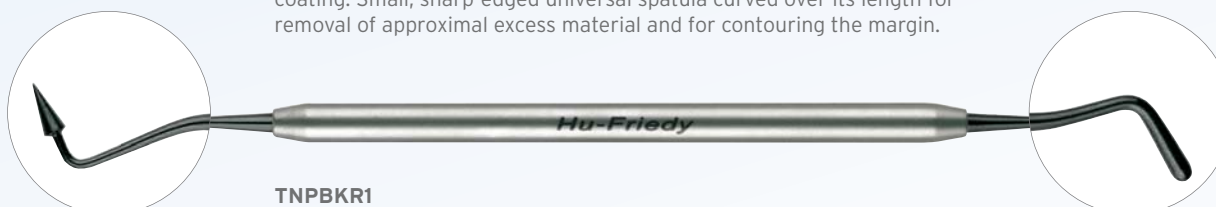

**TNPLGKR1M**

Instrument for approximal side-tooth restorations

Medium-size, lancet-shaped stopper for adaptation of the composite on the cervical cavity floor and for structuring the approximal barrier coating. Small, sharp-edged universal spatula curved over its length for removal of approximal excess material and for contouring the margin.

Retail Price:
€ 41,56

Promo Price:
€ 28,90

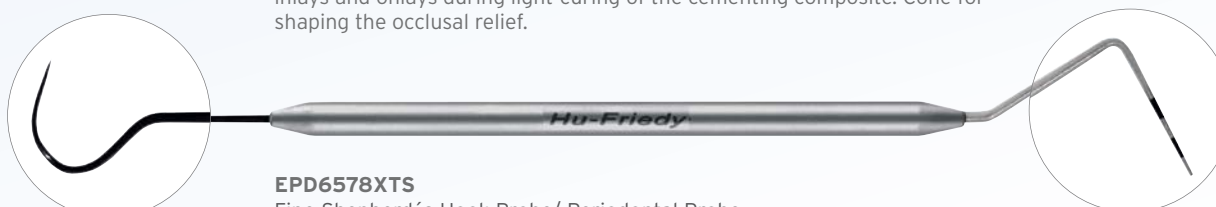

**TNPBKR1**

Instrument for large direct side-tooth restorations and inlay/onlays

Large rounded stopper for composite adaptation in the cavity and for holding inlays and onlays during light-curing of the cementing composite. Cone for shaping the occlusal relief.

Retail Price:
€ 41,56

Promo Price:
€ 28,90

**EPD6578XTS**

Fine Shepherd's Hook Probe/ Periodontal Probe

Shepherd's Hook Probe for detection of caries and defects in restorations. Periodontal Probe for assessing pocket depths.

Retail Price:
€ 46,33

Promo Price:
€ 29,90

SPECIAL PRICE FOR FOR RUBBER DAM CLAMPS LINE, SEE PAGE H14 - H18

Sugg. Retail Price each:

€ 14,72

Promo Price each: € 10,90

Today's dental lighting is brighter and more intense than ever before. Yet most rubber dam clamps reduce visibility by reflecting this light back into your eyes, creating a blinding glare.

Hu-Friedy's Satin Steel Rubber Dam Clamps offset bright clinical lighting. Hand-crafted to absorb and dissipate light instead of reflecting it back, these matte-finish rubber dam clamps are available in 48 sizes to help you perform at your best.

The result is clear, with Hu-Friedy's Satin Steel, you can experience a comfortable field of vision that's easier on the eyes.
