Introducing...

HuFriedyGroup

The Best In Practice

Who We Are

We are a combination of companies that have come together under one roof to deliver the products, services, and solutions you need to be the best in practice. With our passion for infection prevention solutions, premium instrumentation, and service and support programs, HuFriedyGroup will help you perfect your craft and continue to deliver the highest level of care to each patient.

What Can You Expect From HuFriedyGroup?

HuFriedyGroup is here to provide the best dental experience to the industry. Our unique combination of products, services, and support enable dental professionals like you to reduce risk, improve efficiencies, drive compliance, and enhance patient and staff safety.

World-Class Products

Our unwavering passion and unrivaled expertise in the dental industry is evident in the instruments and infection prevention products you trust each and every day.

Compliance & Protection

We provide solutions that help you to ensure a safe environment for patients and staff.

Service & Support

Through our community platforms, customer service and educational programs, we provide you with the information and tools you need to perfect your craft.

RESTORATIVE INSTRUMENTS

AKRO-FLEX™ COMPOSITE INSTRUMENT HU-FRIEDY

CREATE BEAUTIFUL RESTORATIONS

Akro-Flex™ is an extremely flexible composite instrument which allows clinicians to effortlessly manipulate composite materials during aesthetic restorations. **The inclusion of a ductile material allows Akro-Flex™ to perform as a solid brush.**

HYPER-THIN PROFILE

Ultra thin working ends reach narrow interproximal spaces with ease. The flexible, versatile working ends allow for better visibility as compared to traditional composite instruments.

UNPARALLELED FLEXIBILITY

By incorporating Nickel Titanium, a material known for its super elasticity, Akro-Flex™ acts as a solid brush. The resilient working ends are excellent when creating fine anatomical detail with delicate, artistic strokes.

ERGONOMIC HANDLE

The smooth, lightweight handle offers increased control due to the large diameter. It creates an ergonomically friendly option that provides maximum comfort and helps reduce hand fatigue. Reducing hand fatigue can increase the longevity of a clinician's career.

KOL CORNER

Instruments made in collaboration with **Dr. Gaetano Paolone** and **Dr. Salvatore Scolavino**, Opinion leaders Hu-Friedy.

CALIBRA™ COMPOSITE INSTRUMENT HU-FRIEDY

FOR CALIBRATED RESTORATIONS

Calibra™ is an **XTS (AlTiN)^{††}** coated composite instrument which helps to provide the proper anatomical curvature to the dentin material layer of a restoration and leaves the ideal space for the final layer of enamel material. The **Calibra™ “IN”** point is used to define the dentinal skeleton, while the **Calibra™ “OUT”** point helps to reduce the chances of **excess composite** material being placed during the final layer of the restoration. Calibra™ acts as a **guide**, helping to prevent over-contouring at the preparation margin while assisting in reducing excess composite thickness build up as well as **modeling** the final layer of composite material.

€ 44,24

HOW CALIBRA™ IN WORKS

HOW CALIBRA™ OUT WORKS

Calibra™ consists of two terminals: “IN” which defines the dentinal skeleton. “OUT” which allows to verify the thickness and shape of the last layer without excess. This instrument is in fact both the first caliper ever produced to check the thickness (a practical alternative to the sagittal silicone index) and the first modeling tool ever produced for the last layer.

SCISSORS & NEEDLE HOLDERS HU-FRIEDY

DID YOU KNOW? All hinged instruments – forceps, rongeurs, scissors, pliers, hemostats, orthodontic pliers, etc. – should be kept lubricated. Regular use of proper lubricants, like Hu-Friedy Penetrating Oil (IPS) and Instrument Lubricant Spray (ILS), will prevent rust, corrosion and stiff joints to ensure smooth operation. All hinged instruments should be sterilised in the open position.

Cantel Medical Italy Srl is the legal manufacturer

[†]Compliant = Compliant with EPA potable water standard <500 CFU/mL. ^{**}Or, 240L of water if usage records are kept [†]Schabelman E., Witting M. The relationship of radiocontrast, iodine, and seafood allergies: a medical myth exposed, J Emerg Med. 2010 Nov;39(5):701-7. doi: 10.1016/j.jemermed.2009.10.014. Epub 2010 Jan 4. [†]Puttaiah R. Effects of Low Grade Iodine in Dental Unit Waterlines On Shear Bond Strength of a Dentin Bonding Agent, Baylor College of Dentistry. [‡]Data on file at Crosstex.

IMS™ BONDED DOUBLE WRAP HU-FRIEDY

- Two sheets of wrap ultrasonically bonded together on two edges for quick and easy wrapping application, assuring compliance.
- Two different colors sheets to easily identify breaches post sterilization.
- High strength and durability aid in resistance to tears and punctures, protecting contents of the package during storage and transportation.
- Made of SMS (Spunbond Meltblown Spunbond) polypropylene material — any unused or unsaturated wrap can be recycled as a recycle code of "5".
- Compatible with many common sterilization cycles.
- Product part code and size printed on each sheet for quick and easy identification when reordering product.
- Not made with natural rubber latex, enhances safety for patients and users who suffer latex allergies.

IMS™ MONITOR TAPE HU-FRIEDY

Strong 1,9 cm tape can be written on and visually differentiates processed from non-processed cassettes. Pre-printed tape is available with specific procedural set-ups, color-coded or blank. 55m per roll.
